22. Get the mph.license from the user portal

Open the /MP/Host folder as shown **here** and upload your hardware.id file in the user portal

The hardware.id file is automatically generated when you run the MP Host plugin.

> If the hardware.id file is **not** being copied to the Mac's Desktop when trying to setup for the first time, see here

IMPORTANT: The **hardware.id** and **mph.license** files should **not** be renamed

Download the mph.license and place it in the /MP/Host folder next to the hardware.id file

hardware.id File	License Activation Status	License File
hardware.id	Completed	mph.license
