

23. Receiving update notifications for the MP Host plugin

As many tend to keep their studio computers offline or behind firewalls, this would prohibit our plugin to connect on our server and check for updates.

We publish new versions in the mpmidi.com/latest-readme first page and on

<https://mpmidi.com/mph-versions.html>

We don't have a notification system yet, but an easy way to get notifications for new versions is by registering at one of the following free services:

<https://www.wachete.com>

<https://distill.io>

<https://www.followthatpage.com>

and enter this link to monitor

<https://mpmidi.com/mph-versions.html>

Revision #1
