

### 3. How to configure the UPDD smart magnifier (zooming on plugins)

**The Smart Magnifier is already setup and you do not need to go over the steps below.**

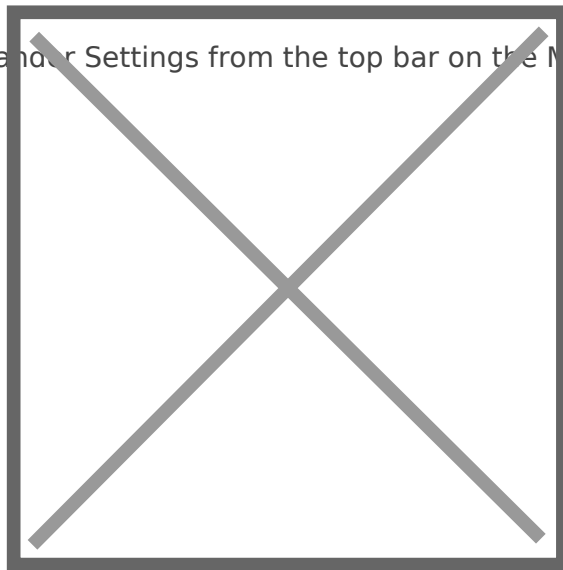

If you need to change the behavior of the Smart Magnifier here are the steps to do so.

“ If the Smart Magnifier shows the desktop instead of zooming on the MP Host plugin see [here](#)

First make sure you have the latest UPDD version installed. This should be normally obtained from **Touch Base**.

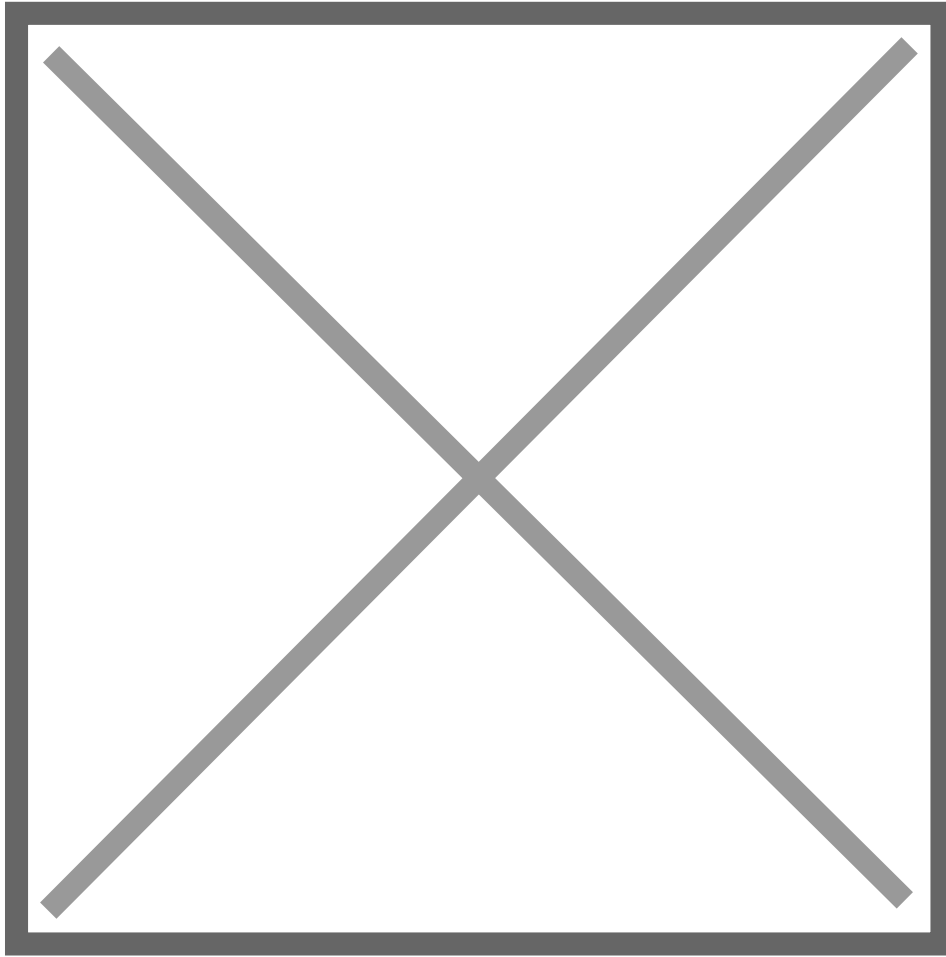

**Allow** the necessary access on Mac OS.

Open the UPDD Commander Settings from the top bar on the Mac

Go to Smart Magnifier tab and set the:

1. Width to 1920
2. Height to 1020
3. Rectangular Shape
4. and to Not follow touches

5. Navigate to All Applications

And set the:

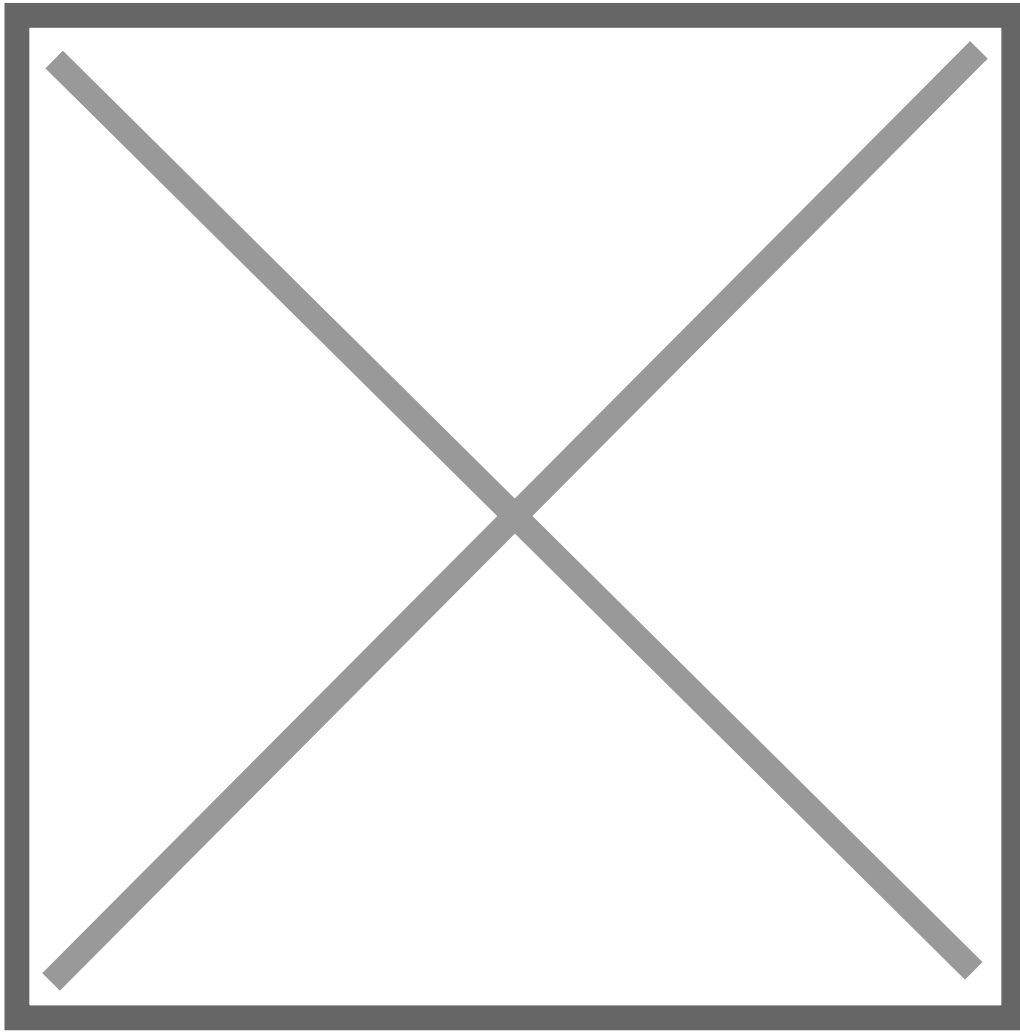

Two Finger Tap to

Action: Show/Hide the Smart Magnifier

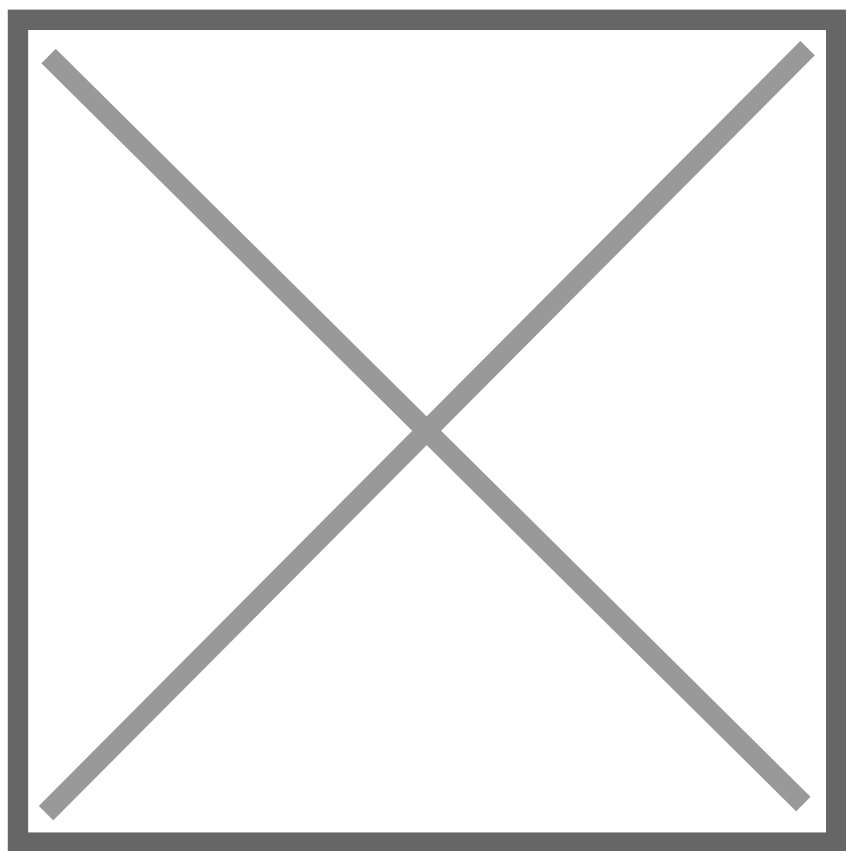

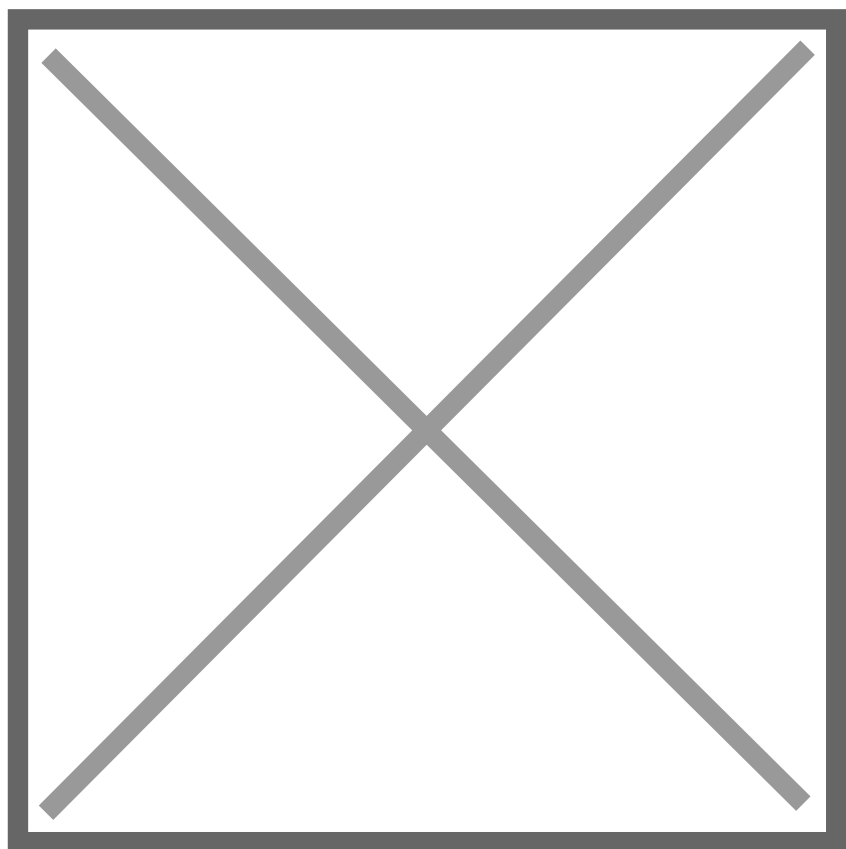

Optionally you can set the

Two Finger Pinch Expand to

Action: Smart zoom

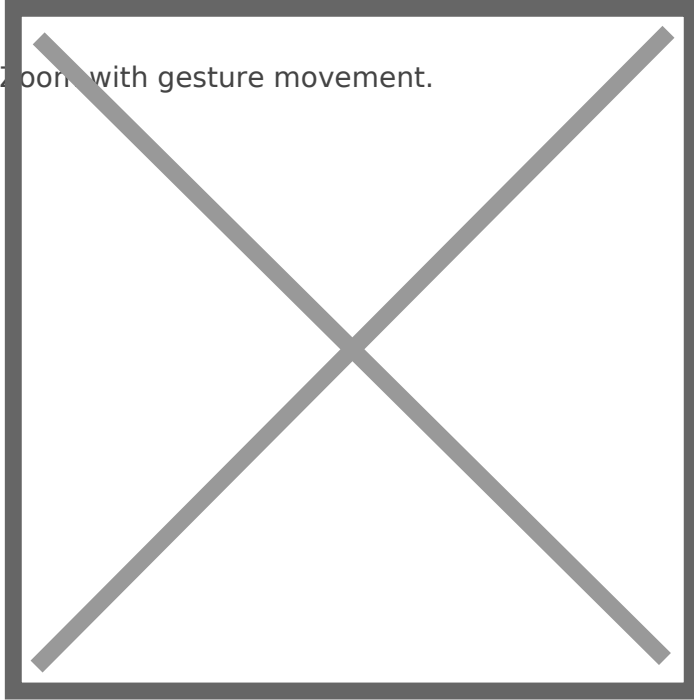

Set the Magnification to your preference ie 200%

Then set the amount of

Zoom with gesture movement.
