

3. MIDI Connectivity (C1-xMP1)

IMPORTANT: For Mac and Windows, disable the MIDI IN/OUT for the C1-xMP1 in your DAW

Do not rename the C1-xMP1 in MIDI Studio on the Mac

MacOS

System Report > USB Tree

If the C1-xMP1 does not show in the System Report check this [guide](#)

MIDI Studio

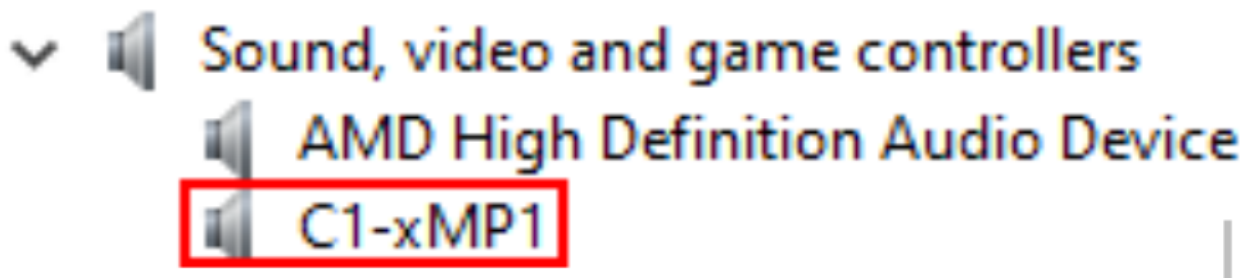

If C1-xMP1 shows in the midi studio but it is not online disconnect the MIDI cable from the controller, delete the C1-xMP1 icon and connect it again.

It should appear online. If it does not appear online, see [this guide](#)

Windows

Device Manager

If the C1-xMP1 does not show in the Device Manager, check this [guide](#)
