

32. Mac - Right click with Magic Mouse does not show pop up menu in the Favorites Window

There were reported cases where some versions of the Apple Magic mouse would not show the right click menu in the Favorites window.

If you are using an Apple Magic Mouse, you have to press the Control key and hold it while you right click to generate the right mouse click.

Additionally, see the following suggestions on how to troubleshoot the right click on the Mac in [this article](#)
