

40. Sending MIDI notes from the MP Host

In the July 2024 update (Beta MPH v1.7-91f44c9b--H2024-07-20--B2024-07-20) we introduced the ability to send MIDI notes out to the DAW when using a plugin that has this ability (like Sequencer or Arpeggiator **Instrument** plugins like Audiomodern Riffer).

This update applies on both the **Instrument** MP Single host and Instrument Multi host (not the FX MPH).

See a [demo video](#) in Ableton Live.
