

Latest MP Host Release

v1.7-7123e00f--H2025-05-05--B2025-05-05

You can download the latest release from your account in the user portal

Version changes are described [here](#)

New versions are also published [here](#)

As many tend to keep their studio computers offline or behind firewalls, this would prohibit our plugin to connect on our server and check for updates.

We publish new versions in the mpmidi.com/latest-readme first page and on

<https://mpmidi.com/mph-versions.html>

We don't have a notification system yet, but an easy way to get notifications for new versions is by registering at one of the following free services:

<https://www.wachete.com>

<https://distill.io>

<https://www.followthatpage.com>

and enter this link to monitor <https://mpmidi.com/mph-versions.html>

Revision #10
